## Invitation

In the face of the 4th Industrial Revolution, an ecosystem of hyper-connectivity, hyper-convergence, and super-intelligence is being formed, and related research is being actively carried out in various fields such as education, culture, and entertainment.

Artificial intelligence convergence technology has shown many achievements with the development of computer performance, but has not yet penetrated deeply into our daily life.

Our center will hold the 2021 International Conference on Future Intelligent Computing (ICFIC 2021) at Daegu University. Under the theme of Future Intelligent Computing, this conference will provide a forum for discussions with researchers from universities, industries, and research institutes in related fields such as artificial intelligence, big data, Internet of Things, cloud computing, block chain, and intelligent robots.

We look forward to your submission and participation in this ICFIC 2021, as beneficial topic lectures, presentations, and high-quality academic papers will be presented. thank you.
